

ABSTRACT

A liquid drug container comprises a container body 1; a nozzle member 2 liquid-tightly mounted on the container body 1; and a nozzle cap 6 fitted on the nozzle member2. A nozzle hole 231 of the nozzle member 2 is covered with a hydrophilic filter 3, and a top wall of the nozzle member 2 is provided with an air hole 24 covered with a hydrophobic filter 4. The nozzle member 2 may be provided with a filter-mounting member 8 for attachment of the filters. Also, the nozzle member 2 may be provided with a flow control member that controls air flowing into the container body through the air hole.
